DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a method of forming a structure, classified in class 438, subclass 128.
- II. Claims 31-61, drawn to a contact structure, classified in class 257, subclass 211.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case said resist could have been formed over said dielectric layer before etching said semiconductor layer to form said lower trench and start from the resist layer down to the dielectric layer to make the trenches.
